

**PROBLEM STATEMENT. : CBP33  
NUMBER**

**PROBLEM TITLE. : A solution/idea that can boost the current situation of the tourism industries including hotels, travel and others.**

**PROJECT IDEAS.:**

- In our web page application we have added icons representing domestic and international trip. It makes it simple for the users to make their trip easier.
- After segregating the mode of travel, we have planned to add a search bar, which allows the users to go through various options. Once the user selects their destination, we would provide them the information about the Hotspots, Hotels, Restaurants, etc.... including the emergency contacts of that particular region such as (hospitals, police station,...)
- Just to attract the family people as a bunch. We also provide an option of tour packages which directly increase the monetization of the company.
- **Whenever the user selects some destination, we have planned to design the hotspots of the place as levels of completion which psychologically makes the people to move to the next level, just like the game "CANDY CRUSH". By this way, we could gain a lot of tourists. These levels would be created with the help of previously collected tourists reviews.**

FLOW CHART:
